

Moderna Booster Wastage Tables

The following tables are provided to assist you with determining the amount of waste that may be reported in vials of Moderna 14 or Moderna 10 when administering a combination of primary (0.5 mL) and booster (0.25 mL) doses. The number of full doses administered (primary series) is listed on the horizontal axis. The number of booster doses is listed on the vertical axis. Identify the appropriate line for each type of doses administered from a single vial. The intersection of those lines represents the number of doses wasted. If your intersection lands within the green field, no wastage occurred, and no reporting is necessary. When administering vaccines, do not forget to track which type of dose (primary or booster) was extracted from each vial.
